

Project Name	Project Description	Project Cost	Completion Date
1	Limited Infiltration and Inflow Investigation of the PUA's Wastewater Collection System	\$ 250,000.00	December, 2019

Smoke testing will be conducted on select areas of the PUA's wastewater collection system as a means to help determine those areas of the collection system that are allowing precipitation and/or groundwater to enter through breaches in manholes and/or buried pipes. The results of the smoke testing will be summarized in a concise technical memorandum outlining the findings of the testing and the locations of the apparent breaches.
